

In the Claims:

1. (Currently Amended) A communication apparatus, comprising:
a speaker;
a headband which connects to said speaker at an end thereof;
a wireless communication module coupled to said speaker; and
an antenna arranged at a certain position on said headband, and coupled
to said wireless communication module via a cable,
wherein the certain position is different from the end of the headband that
connects to the speaker.

2. (Original) A communication apparatus according to claim 1,
further comprising a flexible circuit board on which said antenna is mounted.

3. (Currently Amended) A communication apparatus according to
claim 2, wherein said flexible circuit board is provided at a predetermined
inclination angle to a mounting surface at the certain position of said headband.

4. (Original) A communication apparatus according to claim 1,
further comprising a second antenna arranged at the end of said headband, and
coupled to said wireless communication module.

5. (Original) A communication apparatus according to claim 1,
wherein said antenna is arranged on a higher portion in said headband than
said speaker in a condition under which said communication apparatus is used.

6. (Currently Amended) A communication apparatus according to claim 1, wherein, said headband has an arc portion, and the certain position on which said antenna is mounted is in the arc portion.

7. (Currently Amended) A communication apparatus according to claim 6, wherein said headband has an ~~insertion~~ elastic member arranged connected at two places in an inside area of the arc portion, and the elastic member is arranged apart from said antenna.

8. (Currently Amended) A communication apparatus, comprising:
a pair of speakers;
a headband with two ends which connects to each of speakers respectively;
a wireless communication module coupled to said speakers; and
an antenna arranged on a substantially central part of said headband,
and coupled to said wireless communication module.

9. (Original) A communication apparatus according to claim 8, further comprising a pair of ear pad parts attached to said pair of speakers respectively.

10. (Original) A communication apparatus according to claim 9, wherein said wireless communication module is arranged at one of said ear pad parts.

11. (Original) A communication apparatus according to claim 9, further comprising a second antenna arranged at one of said ear pad parts.

12. (Original) A communication apparatus according to claim 11, wherein said antenna is located nearer the other ear pad part than said ear pad part at which said second antenna element is provided.

13. (Cancel)

14. (Original) A communication apparatus according to claim 8, further comprising a flexible circuit board on which said antenna is mounted.

15. (Currently Amended) A communication apparatus according to claim 14, wherein said flexible circuit board is located at athe substantially central part of said headband.

16. (Currently Amended) A communication apparatus according to claim 8, wherein said headband has an arc portion, and an ~~insertion~~elastic member arranged connected at two places in an inside area of the arc portion, and the elastic member is arranged apart from said antenna.

17. (Cancel)

18. (New) A communication apparatus according to claim 1, wherein the wireless communication module includes a radio unit, an audio CODEC, an input/output interface, and a signal process/control unit.

19. (New) A communication apparatus according to claim 8, wherein the wireless communication module includes a radio unit, an audio CODEC, and input/output interface, and a signal process/control unit.

20. (New) A communication apparatus, comprising:
a speaker;
a headband which connects to said speaker at an end thereof;
a wireless communication module coupled to said speaker; and
an antenna arranged at a certain position on said headband, and coupled
to said wireless communication module,
wherein the certain position is different from the end of the headband that
connects to the speaker.

21. (New) A communication apparatus according to claim 18, wherein
the certain position correspond to a parietal portion of a user where the user
wears the headband.

22. (New) A communication apparatus according to claim 18, wherein
the certain is a central part of the headband.
